

# BILL OF LADING - Dummy Import Scenario

DUMMY TRAINING DOCUMENT - NOT LEGAL, TAX, OR CUSTOMS ADVICE - DO NOT USE FOR REAL IMPORT / EXPORT OPERATIONS

Purpose: A Bill of Lading is the transport document issued by the carrier or freight forwarder. It works as evidence of receipt of cargo and contains route, vessel/voyage, shipper, consignee, notify party, containers and cargo description.

| B/L No.      | Carrier           | Vessel / Voyage      | Place of receipt |
|--------------|-------------------|----------------------|------------------|
| SZXMEX260188 | OceanBridge Lines | OBL PACIFIC / V.104E | Shanghai, China  |

| Shipper                                               | Consignee                                                                                        | Notify party                                                                        |
|-------------------------------------------------------|--------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
| Shenzhen Parts Co.<br>88 Futian Road, Shenzhen, China | Industrias Norte MX, S.A. de C.V.<br>Parque Industrial Queretaro, Queretaro<br>RFC: INM920415KQ8 | Aduanal Vega & Asociados<br>Lazaro Cardenas, Michoacan<br>Contact: ops@vega.example |

| Port of loading | Port of discharge | Final destination | Freight terms   |
|-----------------|-------------------|-------------------|-----------------|
| Shanghai        | Lazaro Cardenas   | Queretaro, Mexico | Freight collect |

| Container No. | Seal No.  | Packages    | Description                          | Gross KG |
|---------------|-----------|-------------|--------------------------------------|----------|
| MSCU1234567   | SLCN99821 | 12 pallets  | Electronic components                | 4,100    |
| MSCU7654321   | SLCN99822 | 10 pallets  | Electronic components                | 3,780    |
| TGHU5551112   | SLCN99823 | 180 cartons | Electronic components                | 2,600    |
| CAIU9012345   | SLCN99824 | EMPTY?      | Listed on BL but not on Packing List | 0        |

Key fields AI should extract: B/L number, carrier, shipper, consignee, notify party, ports, vessel/voyage, freight terms, container numbers, seals, packages, cargo description and gross weight.  
Common rules/checks: consignee and notify data should be complete; container IDs/seals should match packing list; B/L route should align with operation route and ETA; cargo description should not be too vague for compliance review.
